

Vaccine Fact Summary

1. In 2011, the U.S. Supreme Court ruled that vaccines are “unavoidably unsafe.” *Bruesewitz v. Wyeth LLC*, 131 S. Ct. 1068, 179 L.Ed.2d 1 (2011).¹
2. National Vaccine Injury Compensation Program (NVICP) vaccine injury and death payouts²:
 - a. Total to date (1989-2015): \$ 3.1 Billion
 - b. Average annual payout 2005-2009: \$ 75,630,051 per year
 - c. Average annual payout 2010-2014: \$221,822,386 per year
 - d. Cases pending: 1,943
3. There is vast underreporting of vaccine adverse events. FDA: As few as 1% of serious adverse reactions are reported.³ CDC: Only about 10% are reported.⁴ Congress: Has heard testimony that medical students are told not to report suspected adverse events,⁵ despite federal law requiring doctors to report suspected adverse events.⁶ National Vaccine Information Center (NVIC) survey: 1 out of 40 doctor's offices (2.5%) in New York report a death or injury following vaccination.⁷ Association of American Physicians and Surgeons (AAPS): Only 10% of serious vaccine adverse events are reported.⁸
4. The Federal Court of Claims lists about 140 attorneys that accept vaccine injury and death cases.⁹ This number has been steadily increasing in recent years.
5. The National Childhood Vaccine Injury Act of 1986 (NCVIA) shields vaccine manufacturers from liability for the death and disability caused by their vaccines. There is no financial incentive for manufacturers to produce safer vaccines.¹⁰
6. 90-95% of 1900's infectious disease decline preceded the vaccines. Absence of vaccination will not bring back infectious disease rates of pre-vaccine days. Graphs:
<http://www.theoneclickgroup.co.uk/documents/vaccines/Immunization%20Graphs%20PPT%20-%20RO%202009.pdf>, <https://childhealthsafety.wordpress.com/graphs/>
7. According to the CDC:
 - a. Vaccines are 85 – 95% effective (5 - 15% of children do not develop immunity from their vaccines), and most outbreaks start in vaccinated children.¹¹
 - b. The median vaccine exemption rate in the U.S. is 1.8%.¹² There are more than 5+ times more non-immune *vaccinated* children than exempt children.
 - c. Exempt children can get natural immunity, without even developing symptoms.¹³ You can't tell a child's immune status based on their immunization status.
8. The American Medical Association Code of Medical Ethics recommends “medical, religious, or philosophic” exemptions to immunizations for medical doctors.¹⁴
9. The pharmaceutical industry is the biggest defrauder of the federal government under the False Claims Act.¹⁵ In the last 5 years, \$19.2 billion were returned from attempts to defraud federal health programs, more than double that of the previous 5 years (as of February 2014).¹⁶
10. In 8 years (2004-2012), there were twenty pharmaceutical company settlements in the \$345 million to \$3 billion range.¹⁷ Criminal fines in the \$100's of millions are common, and have been as high as \$1 billion (Pfizer 2009, GlaxoSmithKline 2012). This is routine business practice.
11. Merck, manufacturer of the mumps vaccine, is going to trial in two separate lawsuits for allegedly falsifying the efficacy rate of its mumps vaccine. One suit was filed by former employee-whistleblowers, the other by pharmaceutical competitors.¹⁸

Conclusions:

1. There is insufficient data available to determine whether or not vaccines provide a net benefit.

2. There's no way to determine the risk of vaccine injury or death for any given individual.
3. Individual freedom of choice provides a necessary "check and balance" to the pharmaceutical industry's overreaching, liability-free, marketing influence over vaccine policy and law.
4. Young adults are not required to risk their lives with mandatory military service, but newborn infants are required to risk their lives with a Hep B vaccine, for a disease they are not at risk of acquiring or spreading unless the mother, who can be tested, is infected. This is not reasonable.
5. Parents for their children, and adults for themselves, should be allowed to make vaccine decisions, in consultation with the healthcare professional of their choice.
